

**HXPERIENCE**  
a **Decide.Action** company

# Hxperience Tertiary Decree - BACS Decree Solution

Your solution to comply with the Tertiary and BACS Decrees.

The Tertiary and BACS Decrees in France regulate building energy performance, each targeting specific objectives and building types. This solution provides a system to monitor, analyze, and optimize energy use, ensuring compliance. What else can your wireless-connected buildings accomplish for you?

▶ **Tailored Energy Optimization:** Hxperience offers a structured, end-to-end solution, from consulting to project implementation, ensuring energy performance improvements are aligned with your specific building and operational needs.

▶ **Comprehensive Metering for Insight:** By identifying and analyzing key energy flows, we help you create an actionable metering plan that drives energy efficiency, tracks performance indicators, and ensures continuous improvement.

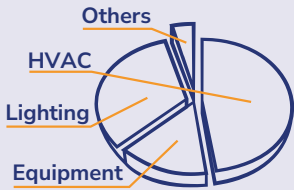

▶ **Sustainable Performance Gains:** Our approach focuses on long-term ROI energy savings, allowing you to calculate post change ROI. Through certified systems and standardization, we offer versatile solutions for any building.

▶ With our unique **Decision Rule Engine**, we go further by automating HVAC control, including temperature and airflow, based on custom rules. This powerful feature boosts energy efficiency and delivers significant cost savings for your business.

What are the typical steps required to implement an energy improvement project?

Analysis of site's energy consumption and usage

Installation of high-performing equipment and wireless sensors

Analyze trends, identify anomalies, plan energy reduction objectives

Calculate ROI, implement changes, then recalculate ROI

Activity Network Server with dashboards providing key operational insights on the network & alarm management.

SMATI accelerates the digital transformation of buildings and workplaces. It provides a 360° control for a more sustainable and high performing building management. It delivers a true digital building solutions that create competitive advantage.

**Transform your operations with energy-efficient solutions for lasting savings!**
